00

Catalog Map

A direct path from FOS capability to standard profile selection and available sizes.

01	FOS Overview	03-04
02	Seal Engineering	05-07
03	Product Profiles	08-12
04	Size Range	13 onward

01

Integrated Manufacturing

FOS connects compound development, metal preparation, molding and validation in one manufacturing system.

01	Metal stamping	Case geometry and retention
02	Surface treatment	Preparation for rubber-to-metal bonding
03	Adhesive application	Controlled coating and drying
04	Rubber mixing	NBR and FKM compound control
05	Compression molding	Stable cure and profile formation
06	Finishing and assembly	Lip trimming, spring assembly and inspection

01

Quality System

Process control supports repeatable dimensions, bonding and sealing performance.

IATF 16949:2016

Automotive quality management

ISO 9001:2015

Quality management system

ISO 14001:2015

Environmental management system

Validation

Dimensional, material and functional testing

02

Seal Selection Inputs

The correct profile depends on the interface and duty, not dimensions alone.

DIMENSIONS	Shaft diameter, housing bore and width
MEDIA	Oil, grease, fuel, coolant or process fluid
DUTY	Speed, pressure and temperature range
INTERFACE	Shaft hardness, roughness, runout and housing condition
TARGET	Service life and validation requirement

02

Material Guide

Material labels in this catalog state polymer family and nominal Shore A hardness.

Material	Typical positioning	Selection note
NBR70A	Mineral oils and general industrial service	Standard temperature and cost balance
NBR80A	Higher hardness NBR	Improved extrusion resistance where suitable
FKM70A	Heat and chemical resistance	Higher temperature and demanding media
FKM80A	Higher hardness FKM	Applications needing additional hardness

02

Profile Logic

The original FOS 2D sections show the functional difference between sealing and exclusion lips.

SC
Spring-loaded single lip

TC
Spring-loaded main lip with dust lip

VC
Single lip without spring

KC
Two non-spring lips

03

Standard Product Profiles

Original high-resolution FOS profile graphics for precise product identification.

SC

Single lip + spring

TC

Main lip + dust lip

VC

Single lip, no spring

KC

Double lip, no spring

SB

Metal-cased single lip

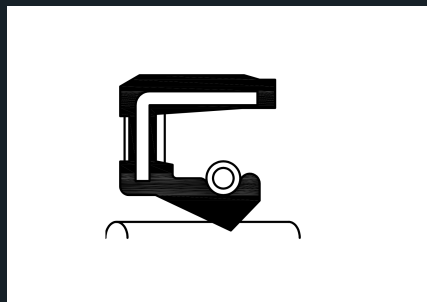

TYPE SC

Single Lip Oil Seal

One spring-loaded primary sealing lip for general rotary shaft applications.

Metric 448 / Inch 94

TYPE TC

Double Lip Oil Seal

A primary sealing lip with an auxiliary dust lip for added contamination protection.

Metric 1,409 / Inch 159

TYPE SB

Metal-cased Single Lip Oil Seal

An exposed metal outside diameter with one spring-loaded sealing lip.

Inch 8

SC / METRIC SIZE RANGE
